# 1 Introduction

## 2 Problem and solution approach

### 2.1 Problem

Today's applications seem to be increasing in complexity over the last few years. Especially in the field of frontend development, the range of functions increases [1]. The web development has transitioned from server rendered, page-reloading websites to modern, so called single page applications.

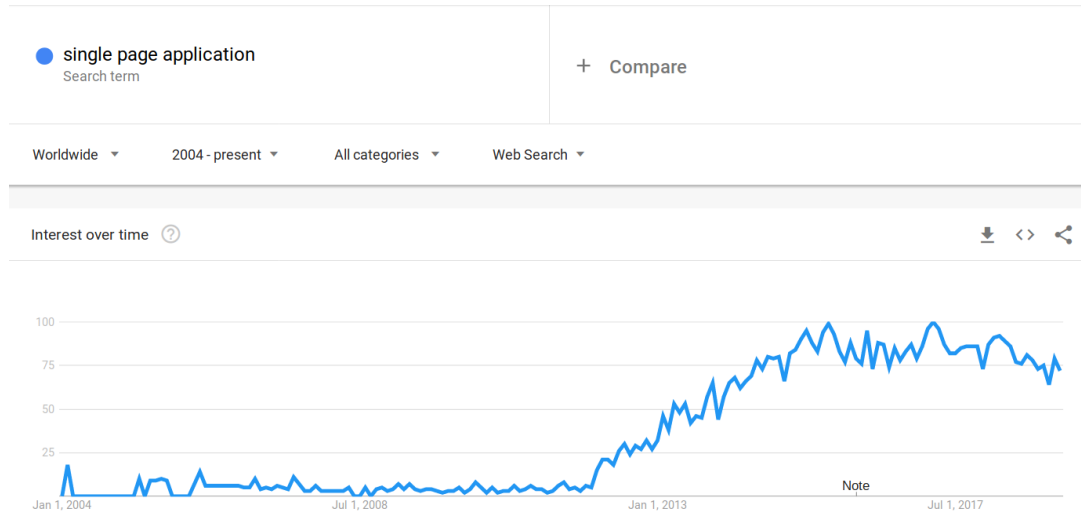

Figure 1: Google Trends: single page application

### 2.2 Solution approach

## List of Figures

1	Google Trends: single page application . . . . .	1
